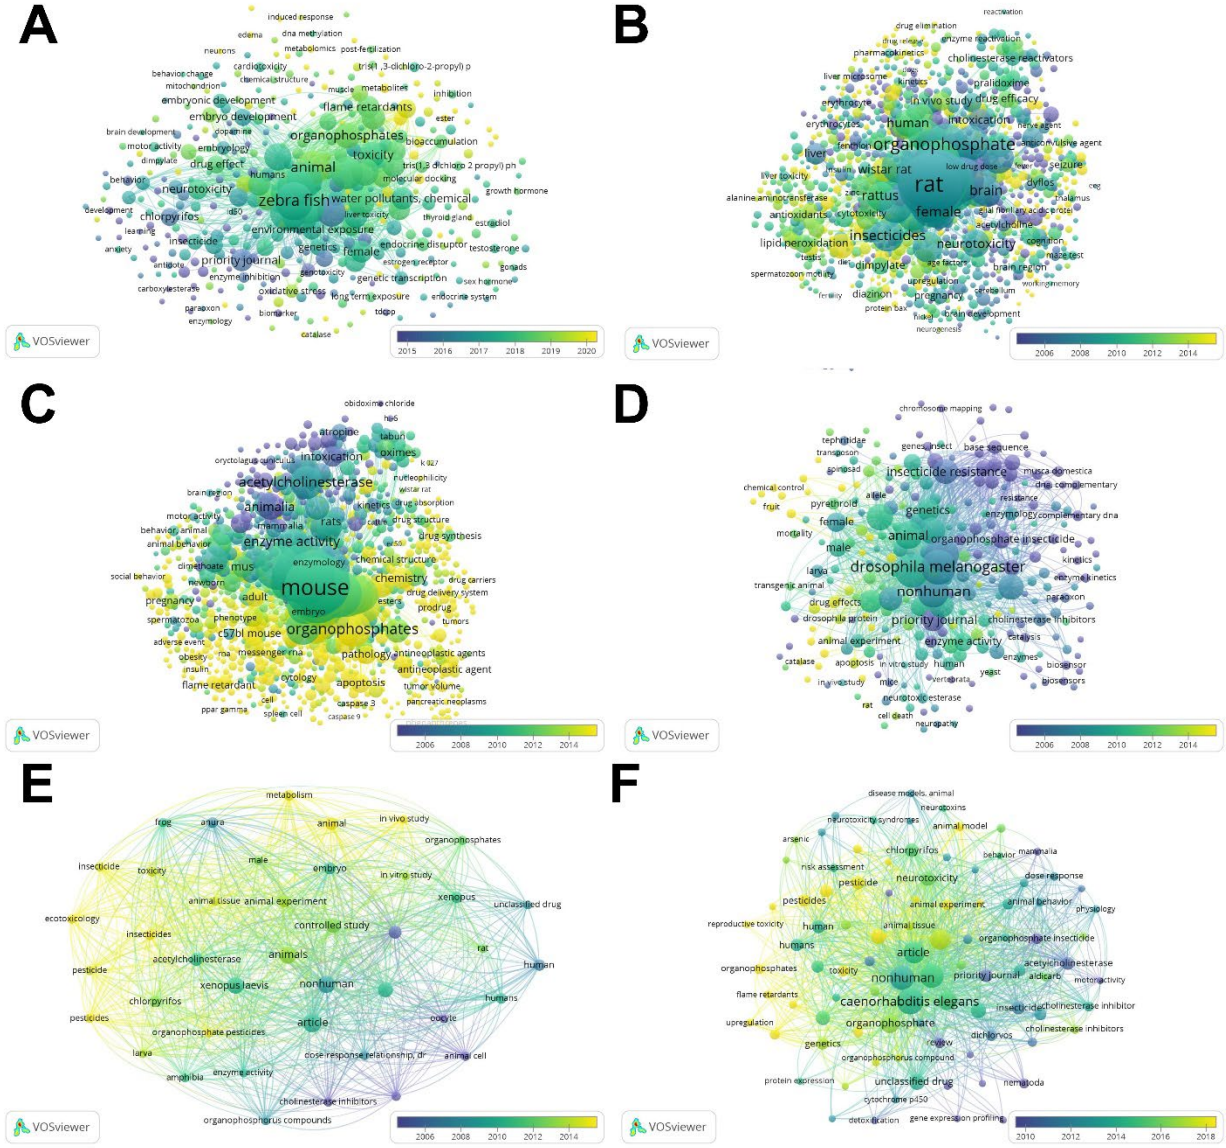
Figure S2.



Supplementary Figure S2. Scopus-based timeline overlay visualization of flavonoid keyword co-occurrence maps across six animal models using VOSviewer. (A) Zebrafish (Danio rerio); (B) Rat (Rattus norvegicus); (C) Mouse (Mus musculus); (D) Fruit fly (Drosophila melanogaster); (E) Frog (Xenopus laevis); (F) Nematode (Caenorhabditis elegans). Color scale indicates average term occurrence by publication year. Maps were generated from Scopus full exports using the same VOSviewer parameters as the PubMed primary series. See accompanying image file.
